

IVAN NMR Users Group

Sponsored by MR Resources and Q.One Instruments

The 2024 IVAN Users Group Founders Award Nominations are Now Open

The mission of the IVAN user group is to “inspire information exchange among our members who use magnetic resonance and to support online and face-to-face meetings of users. We wish to provide a much-needed home base and platform for meetings, communications and other activities of all NMR owners, managers, and users.”

The IVAN Founder’s Award is meant, on an annual basis, to recognize one or more individuals who have alone or together demonstrated excellence in support of the magnetic resonance user community, recognizing the service mission of IVAN beyond normal scientific contribution. The recipients’ contribution may be demonstrated within their organization and/or with other members of the greater NMR community. The award is presented at the annual ENC Conference.

If you wish to nominate someone, please visit the IVAN Founders Award Nomination page on the IVAN Users Group Website. There will be a form there to fill out and an IVAN Executive Committee member will contact you to get further information on your nomination.
